

Standards Committee Update

The LIRP Committee met on **April 21/06** to review our LIRP progress and the following information was reviewed:

- For efficiency and expediency purposes we identified the following people who make up our LIRP Committee: Tim Hughes, Ken Kuzyk, Dwayne Mayr, Jamie Andersen, Ted Davis, Don Elford, Bob Chisholm, Dale Wilson and Bob Porter
- The following LIRP's have been drafted: safety issues, passive sweep (RF, CPS), Inductive Clamp, Direct Hook Up, Passive Sweep Power mode, new wellsite.
- Tim will work on the following and have ready for our May meeting: 360 sweep, reclamation, well head/pin finder
- Jamie missed the last meeting but was working on three LIRP's and will have them ready for our May meeting.
- We agreed that everyone responsible for working on LIRP's will have completed and will email their drafts to the LIRP committee members before the May 19th meeting (see the above member list). This way committee members can print off the entire package of LIRP's and bring to the meeting for review of content.
- Next steps:
 - LIRP Committee members will review contents of drafted LIRP's at May 19th meeting
 - By the end of May, drafted LIRP's will be posted on our website, with restricted access, for input by all CAPULC members
 - At the June meeting, LIRP committee will do final review of LIRP's
 - At July meeting, LIRP's will be submitted to council for adoption.

We plan to cut the general meeting short on May 19th so we can start reviewing our LIRP's (hopefully around 11:00 am)
